

Justin Barrow

*Associate
Alden Legal
London, UK*

Summary

Justin brings a pragmatic, commercially realistic approach to the advice he provides clients, leveraging over 10 years of international, commercial and senior management experience. Justin has worked for Maersk Data (now IBM), the international transport and logistics software and IT services division of A.P.Moeller and as a successful entrepreneur.

Justin advises on commercial technology contracts and all aspects of data protection regulatory compliance with a strength for complex B2B2C technology platforms that increasingly make use of AI technologies across a range of (both regulated and non-regulated) sectors.

Prior to joining Alden Legal, Justin was the only UK candidate selected for the European Space Agency's ECSL course in Space Law and Policy (Class of 2013) and currently sits as a legal advisor for the Satellite Applications Catapult's South West Centre of Excellence SpaceTech Incubation programme, backed by the UK Space Agency.

Justin also speaks, reads and writes Mandarin Chinese.

Relevant Work Experience

- Advised a client operating an innovative, private equity backed technology platform on commercial contracts, managing cross-jurisdictional advice as part of its global roll-out.
- Advised a large international satellite operator on cross-jurisdiction debt enforcement claims.
- Advised a geo-spatial data technology client on intellectual property and cybercrime risks.
- Advised clients on privacy and data protection compliance covering the General Data Protection Regulation 2016 (GDPR), the Data Protection Act 2018 and the Privacy and Electronic Communication Regulations 2003, including advising on a full compliance programme in relation to the use of end-consumer data for a multi-tiered fin-tech lending platform.
- Advised a technology SaaS platform start-up on the space object registration compliance regime (including The Convention on Registration of Objects Launched into Outer Space).
