

"the single most knowledgeable law firm in the UK about space and satellite regulations" Chambers & Partners 2020

We assist several clients by providing external General Counsel Services. These services allow access to senior lawyers who:

- **understand your business and your objectives;**
- **are able to provide prompt, responsive advice, without the delays and administrative burden of seeking ad hoc advice; and**
- **offer specialist advice without the need to employ a General Counsel.**

These services, and some examples, include:

Regulatory - ensuring ongoing regulatory and licensing compliance and obtaining necessary licences and spectrum authorisations (across various applications) in the UK, Europe and globally;

Commercial Contracts - drafting, amending, reviewing and negotiating all forms of commercial contracts, including: satellite procurement; launch services; EO data distribution; and operations contracts;

Policy advice - providing industry-focused policy advice, including national and EU policy advice;

Corporate governance - advising on board and corporate governance issues;

Corporate law - advising on corporate transactions such as investments, joint ventures and acquisitions/disposals;

Finance - reviewing commercial contracts to make them "bankable" and assisting with debt finance transactions and issues;

Security and data management - national security, lawful interception, data management and data protection guidance and advice on the use of new technologies (e.g. cyber security, lawful monitoring and surveillance); and

Consultancy and strategic advice - government advocacy, advice as to strategic partners, business strategy advice and advice as to new applications and establishing new markets.

We can be on call when you need us for as long as you need us. We can work with your board on strategic one-off issues or for longer work packages.
