

CanSat Talks

Agenda

16th September 2021

Alden Foundation with ESERO-UK will be hosting a webinar with a series of presentations from members of the space industry which aims to encourage students and schools to take part in the CanSat competition. The UK competition is run by ESERO-UK, where teams design and build a satellite within the volume and shape of a soft drinks can. The CanSat competition provides students with the opportunity to have practical experience working on a small-scale space project and the winners from the UK competition will go on to compete in the ESA European Final.

Location: Held remotely over Teams

15:45	Welcome <ul style="list-style-type: none"> – Joanne Wheeler MBE, Managing Partner, Alden Legal
